SEMEN CRYO REPORT

Patient's Name	Mr Barrett Christopher		
Patient's D.O.B	29-11-1994		
Partner's Name			
Partner's D.O.B			
Date of Freeze	15-02-2024	**Period of abstinence**	3 Days
Time of production	12:25	**Place of production**	Create Manchester
Embryologist:	FK		

SAMPLE INFORMATION				**Thaw Test**
	Sample Parameters (Actual Result)	**WHO Parameters 2010 (Reference values)**		**Time of analysis: 14:20**
Volume ml	4.5	≥1.5 ml		0.4 ml
Appearance	Normal	Normal		N/A
Viscosity	Normal	Normal		N/A
Liquefaction	Complete	20 minutes		N/A
Density x10^6 /ml	32.00	≥15x10^6 /ml		20.00 x10^6 /ml
Total count x10^6	144.00	≥39x10^6		N/A
Motility	49.9%			
Progressive %	46.8	≥ 32%	≥40%	40.0%
Non progressive %	3.1			0.0%
Immotile %	50.1			60.0%
Normal forms %	4.00	≥ 4%		4.00

17+1 test thaw were cryopreserved. Following the test thaw analysis we expect one or more straw(s) to be suitable for all treatment(s).

Conclusions:

Normozoospermia. All parameters above the lower reference limits, therefore this sample is suitable for any form of treatment.
